Project presentation

- Each group prepares a 15-minute presentation **with audio** on the project outcomes including the following elements:
  1. Introduction
     a) Tell first the group number, topic and members (you can show at the same time the presentation cover page with this information)
     b) Give a short introduction to the topic and explain the justification of the research questions.
  2. Conclusions
     a) Describe the main outcomes from the project and pinpoint the importance of the results.
     b) Carry out a short discussion on the most interesting/important future research directions in the research field.
     c) Give a list of references in the end of the presentation. Remember to cite properly the references always when you justify your claims.
- Do not just read slides but give a *presentation* – by your own words.
- Synchronize audio with the presentation or embed audio in each slide separately
- Template is given in the course pages (*MyCourses*)
- Use *MyCourses* to submit the project presentation
- **DL: 9.11.2015**
